Admin Report Kit for IIS

Reporting tool for Microsoft Windows Enterprise

Product Overview

Admin Report Kit for IIS (ARKIIS) is a powerful reporting tool for Microsoft IIS Administrators. ARKIIS presents IIS configuration information from the IIS Metabase in the form of Trees, Tables and Views. All categories of information reported by ARKIIS are available across multiple web servers and websites. ARKIIS is particularly useful in monitoring and tracking web servers that have a large number of websites, virtual directories and associated configuration settings.

ARKIIS supports current versions of Microsoft Internet Information Server (4.0 / 5.x / 6.0) and localized versions of IIS, including German, Spanish and French.

Benefits

- No agent installation. Information on remote IIS servers is collected, processed and displayed on the same machine where ARKIIS is installed.
- Information is conveniently organized into separate Tab Views and Fields. For example, information about all websites and virtual directories and their settings can be seen in a single view, instead of navigating one site or directory at a time.
- Built-in Reports allow users to quickly select and generate common and frequently used reports. These useful predefined reports have been provided keeping in mind some of the most common tasks in IIS reporting.
- Schedule all the Reports for offline export to MS Access Database, HTML or CSV files.
- Compare the configuration settings of different web servers, websites, virtual directories, security information.
- Filter unwanted fields and select the desired fields to view.
- Apply powerful conditional queries to get a narrow subset of information.
- Prepare and Print tabular management reports. Webmasters & IIS Administrators will be able to precisely define, view, print and present IIS configuration reports.

"I did get a chance to evaluate ARKIIS & found it to be the most useful IIS admin documentation tool I've run across. I have contemplated writing my own application, but have never had the time. This is BETTER than what I imagined could be done."
- Space Gateway Support - Kennedy Space Center, NASA, USA

Thank you very much for including the Quick Report in Admin Report Kit for IIS the report is running successfully. This is the best support I have ever received from a software development company, I am IMPRESSED

- GoDaddy Software Group, Inc., USA:

Key Features

List IIS servers on the network - "List Servers" feature automatically detects all IIS web servers in the enterprise.

Filter and Customize data - Powerful Filter and Customize options to track and report only the desired information.

Export Reports - Flexible Export feature to export reports from ARKIIS to MS-Access database / HTML / Comma Separated Values (CSV) file format.

Preview and Print Reports - Flexible print preview and print options to print the reports from ARKIIS to any local/network printer.

Schedule Report generation - Schedule Manager can be used to schedule reports for any number of servers across the network at specified intervals using the Windows task scheduler.

Server and site comparison - Compare web server, website and virtual directory configuration settings through the standard comparison reports.

Manage Favorite servers and websites - Web servers and websites that need special attention can be tracked using "My Favorite Web Servers" and "My Favorite Websites".

Insight tool

Provides an insight into IIS configuration. Reports the Summary and Detailed information based on "frequency of occurrence (Counts)" of important IIS configuration parameters. For example, "Number of Sites that are in Started, Stopped and Paused states", along with their details.

List of Built-in Web Site Reports

- State - STARTED / STOPPED / PAUSED
- Site operators
- Access permissions - Read / Write / Directory browsing
- Connection settings - LIMITED/UNLIMITED
- Content Expiration settings - Enabled / Disabled
- Execution permissions - None / Scripts / Executables
- Application protection settings - HIGH / MEDIUM / LOW
- Authentication Methods - ANONYMOUS / BASIC / INTEGRATED WINDOWS
- IP address and domain name restrictions
- Web sites with their default documents
- Web site size
- Web site permissions

List of Built-in Virtual Directory Reports

- Access permissions - Read / Write / Directory browsing

- Content Expiration settings - Enabled / Disabled

- Execution permissions - None / Scripts / Executables
- Application protection settings - HIGH / MEDIUM / LOW
- Authentication Methods - ANONYMOUS / BASIC / INTEGRATED WINDOWS
- IP address and domain name restrictions
- Virtual directories with their default documents
- Virtual directory size
- Virtual directory permissions

List of FTP Reports

- General
- Log File Settings
- Extended Log Properties
- Security Accounts
- Messages
- Home Directory
- Directory Security

List of Application Pool Reports

- General
- Worker Process Recycling
- Memory Recycling
- Performance
- Health
- Identity
- Applied Objects

List of Web Service Extensions Reports

- Web Service Extensions
